

MellogangVisuals — Pages

Dokumentasi visual tiap halaman aplikasi dalam tiap state role.

Tiap halaman punya dua versi: **desktop** (1440×900) dan **mobile** (390 iPhone 13).

Screenshot diambil pakai Playwright (`tools/screenshots/capture.js`) dengan login ke akun seeder (admin / editor / pelanggan). Sumber data: hasil `php spark db:seed DatabaseSeeder`.

58 182 942 204" data-label="Text">

Cara lihat lokal: buka file PNG langsung di GitHub / VSCode / image viewer.

58 211 942 233" data-label="Text">

Sumber kode: lihat [DECISIONS.md](../DECISIONS.md) untuk keputusan teknis &

58 240 942 262" data-label="Text">

[README.md](../README.md) untuk setup.

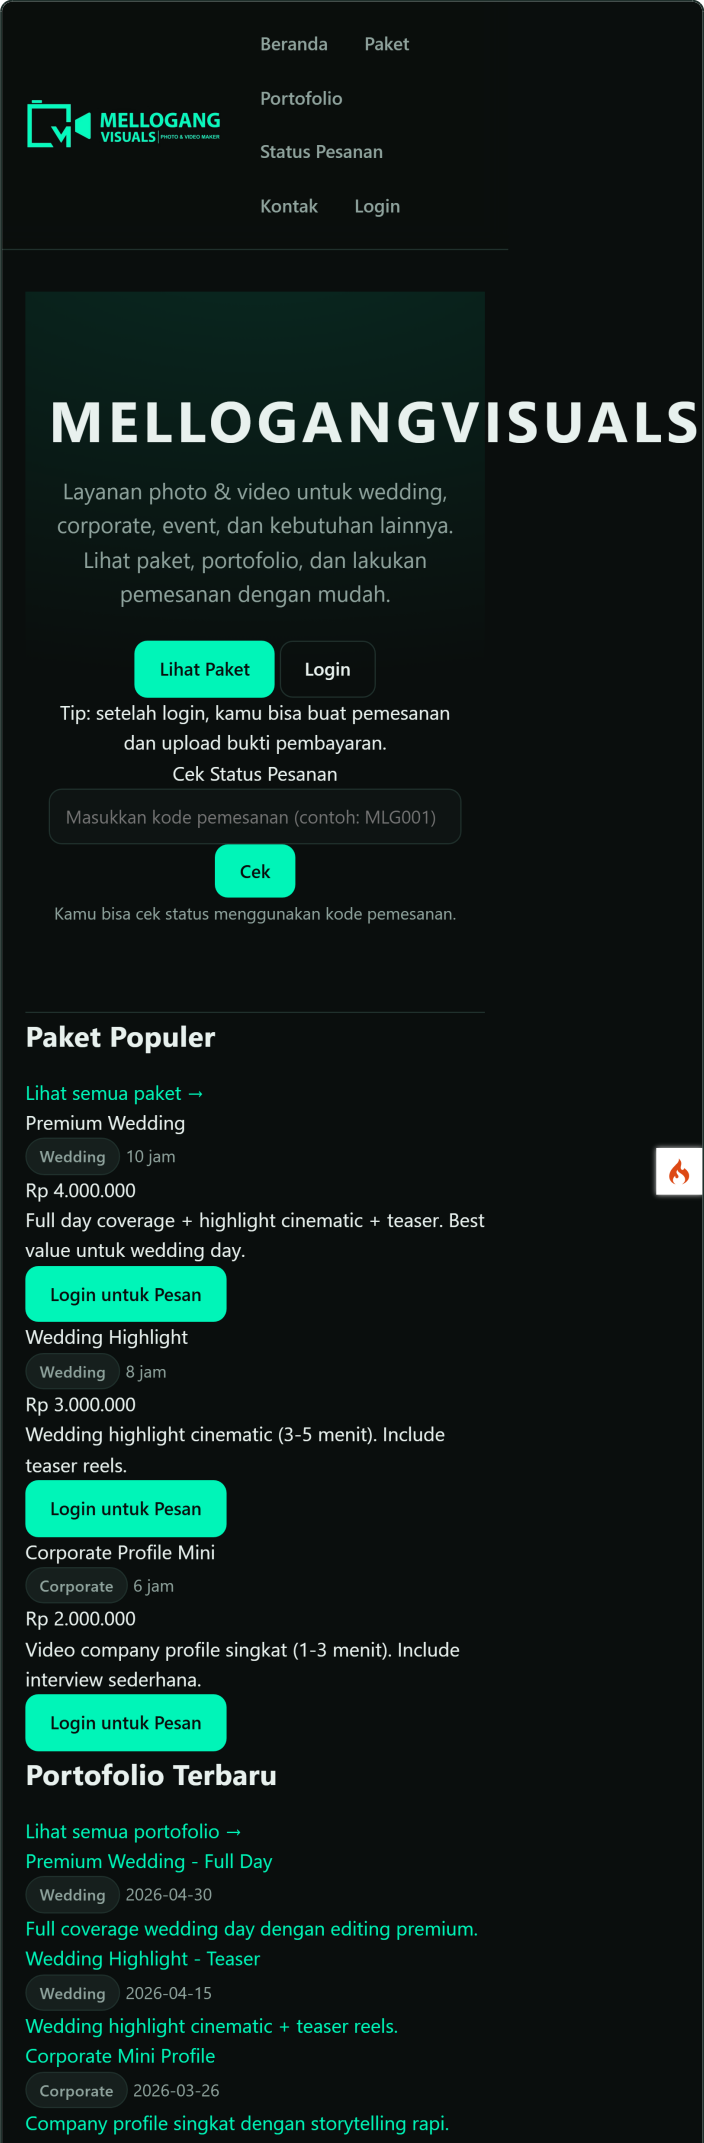

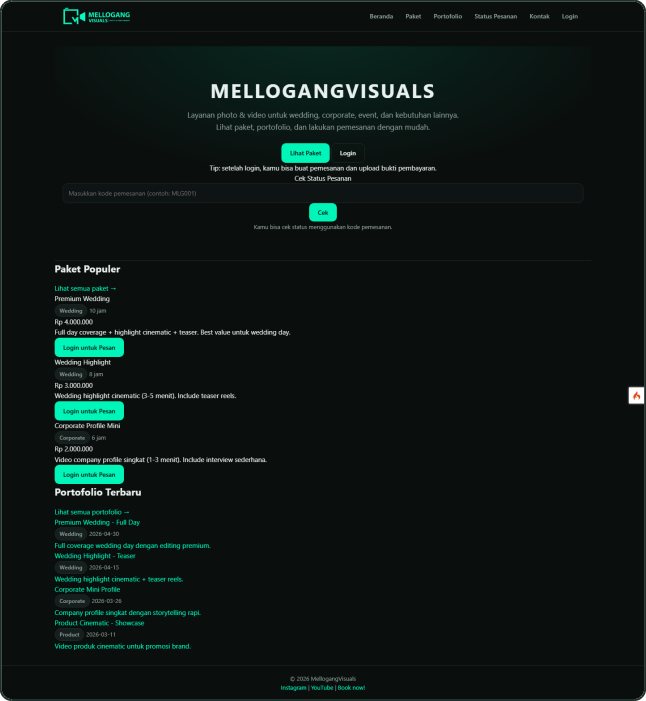

Halaman Publik (tanpa login)

Folder: `screenshots/publik/`

Beranda — `/'

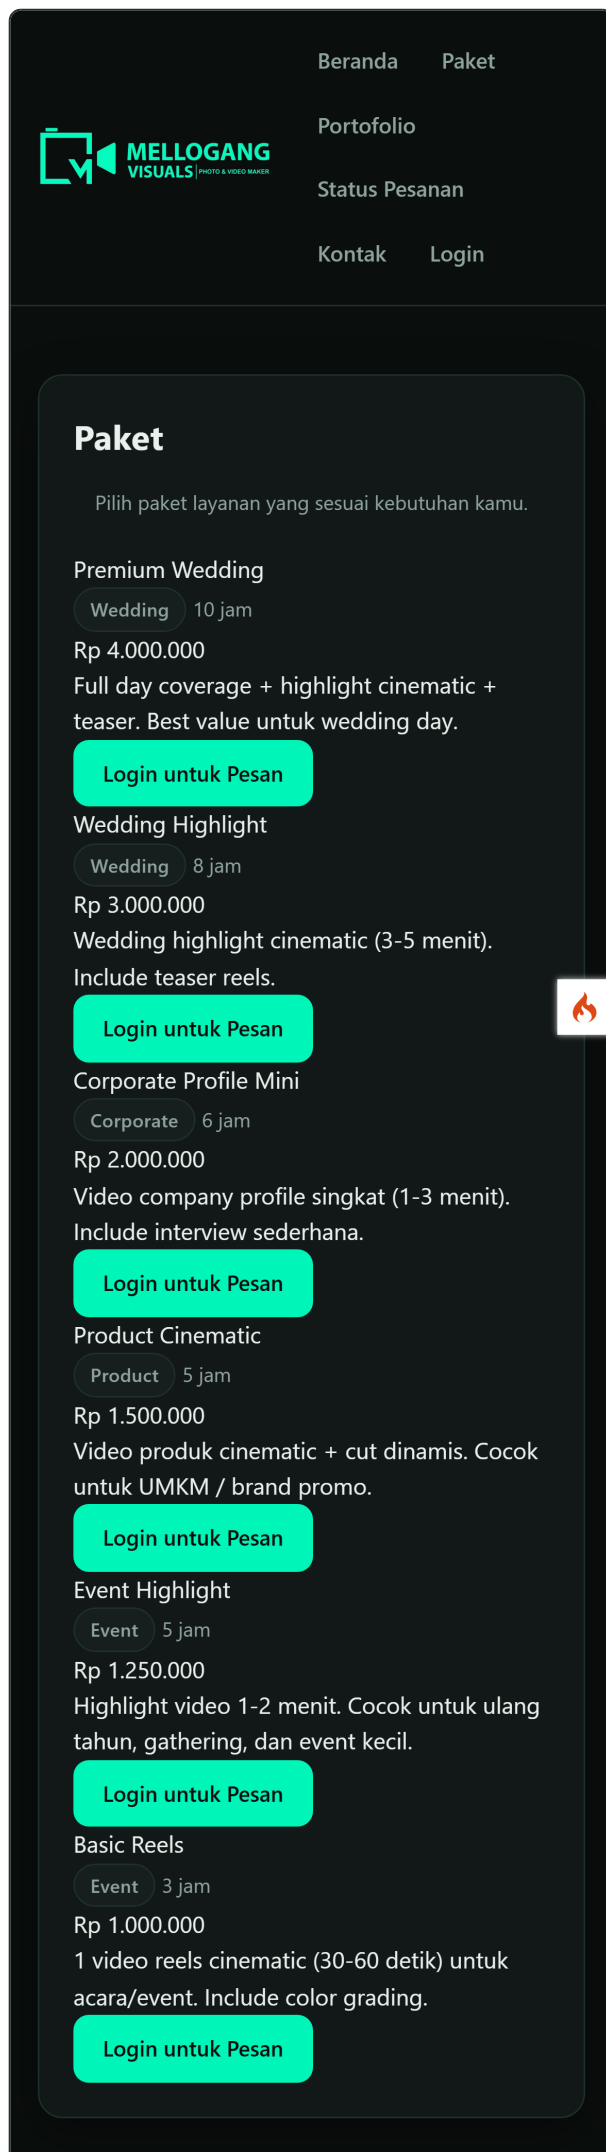

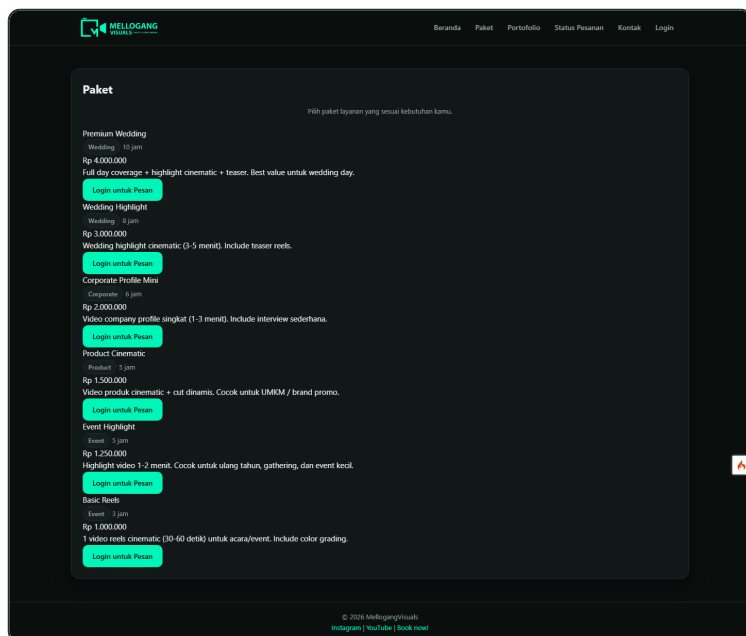

Landing page. Logo, navbar, dan CTA ke katalog / portofolio. Tema gelap-sinematik dengan sentuhan teal `#00F5B8` dari logo.

Desktop	Mobile
---------	--------

Daftar paket foto/video. Harga, kategori, dan durasi. Pelanggan login dulu untuk memesan.

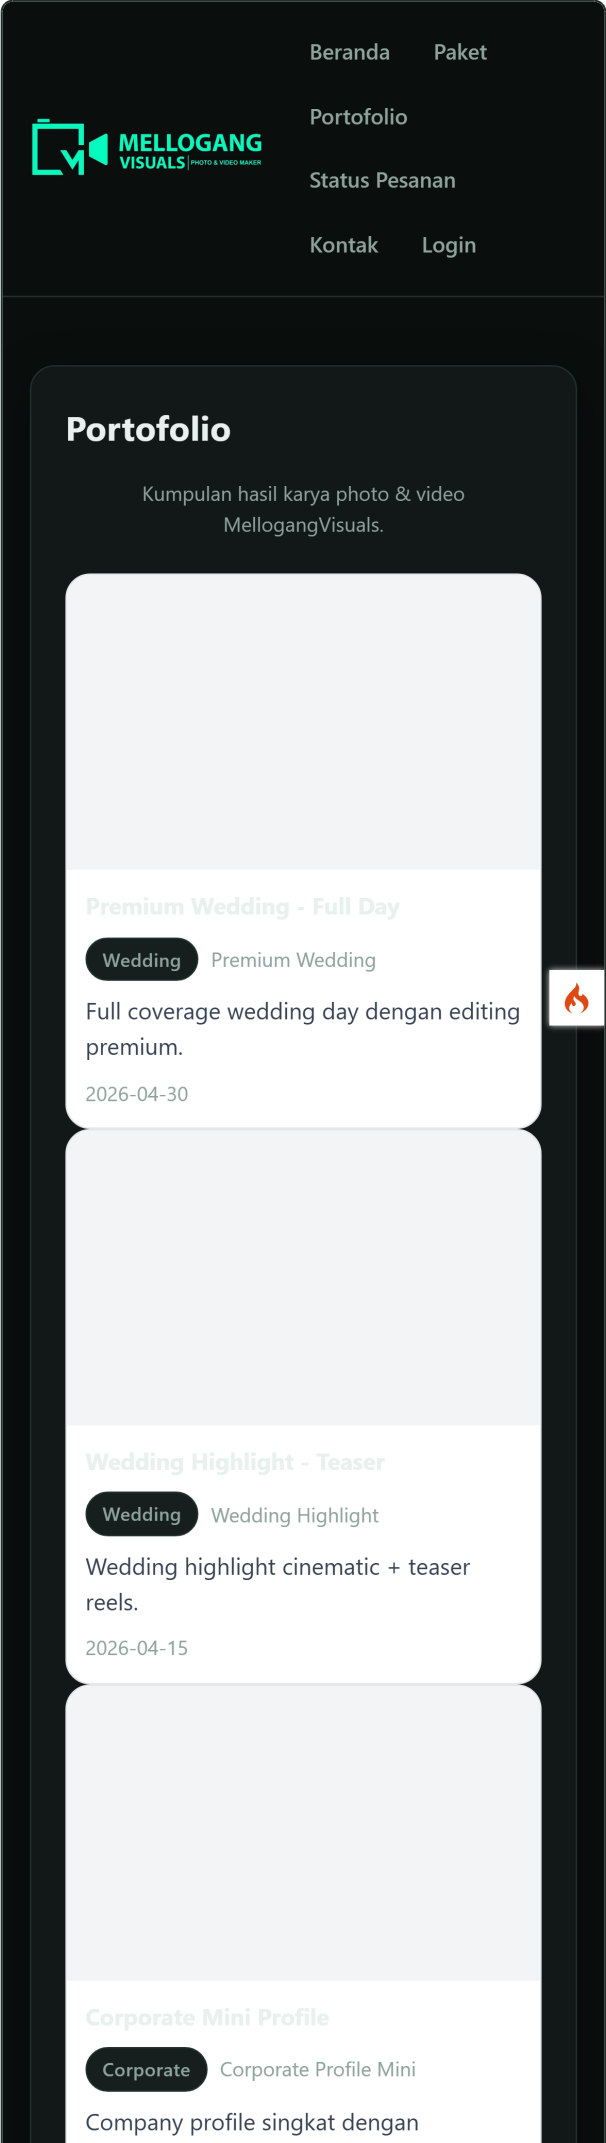

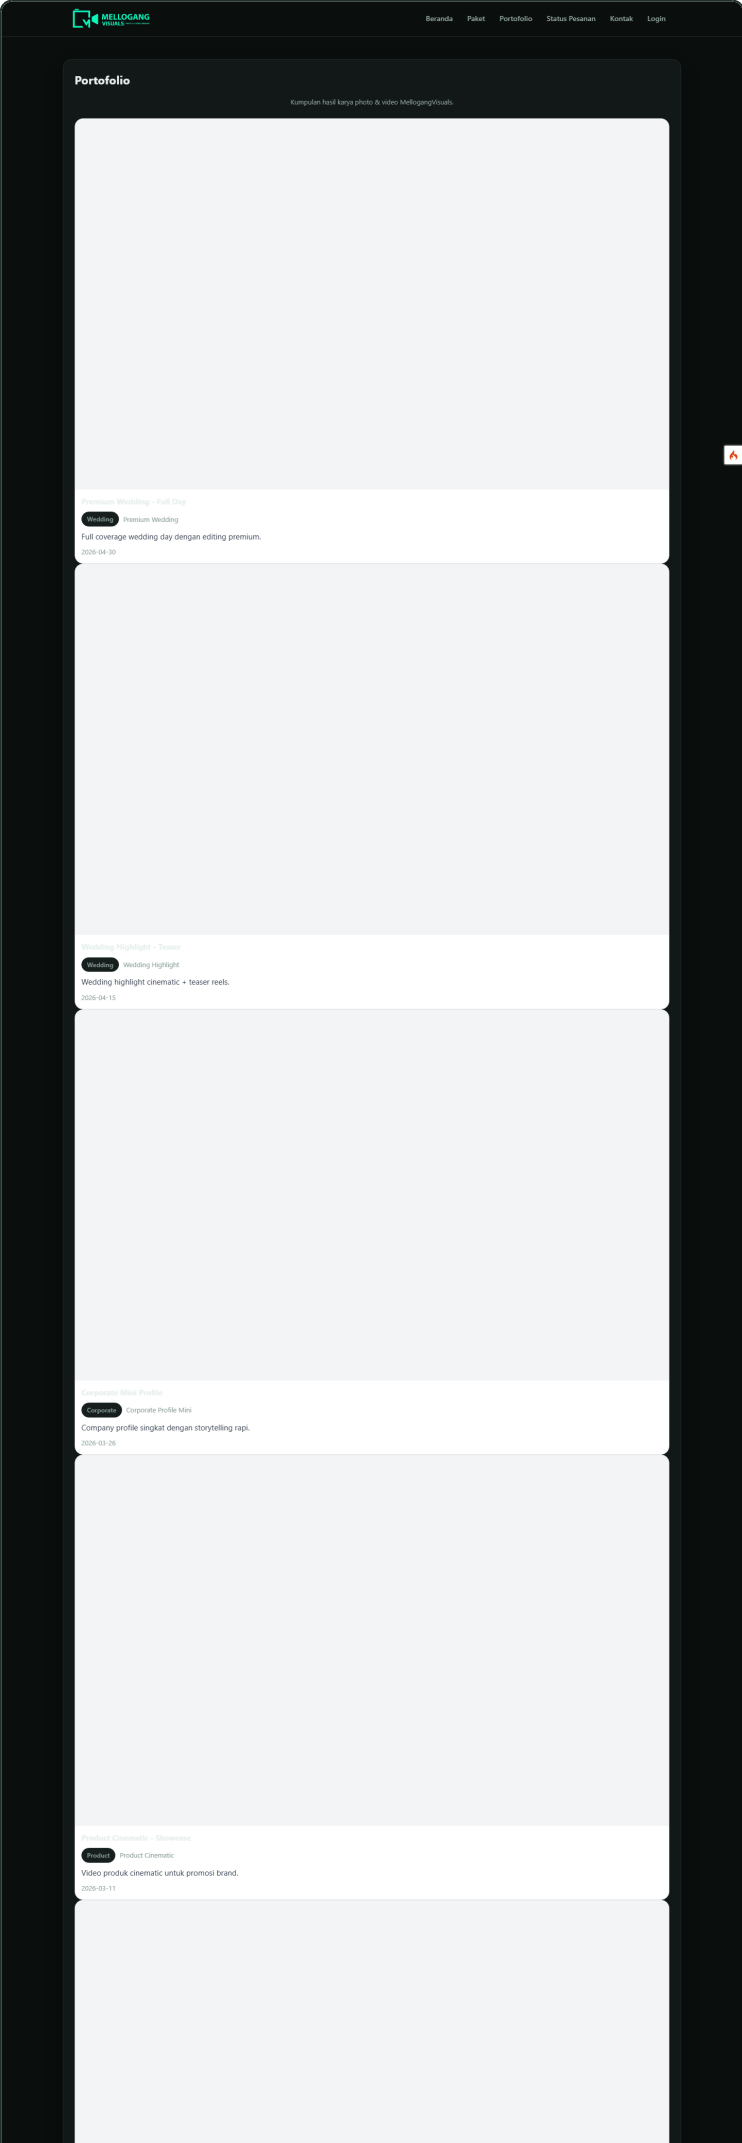

Desktop	Mobile
---------	--------

Portofolio — `/portofolio`

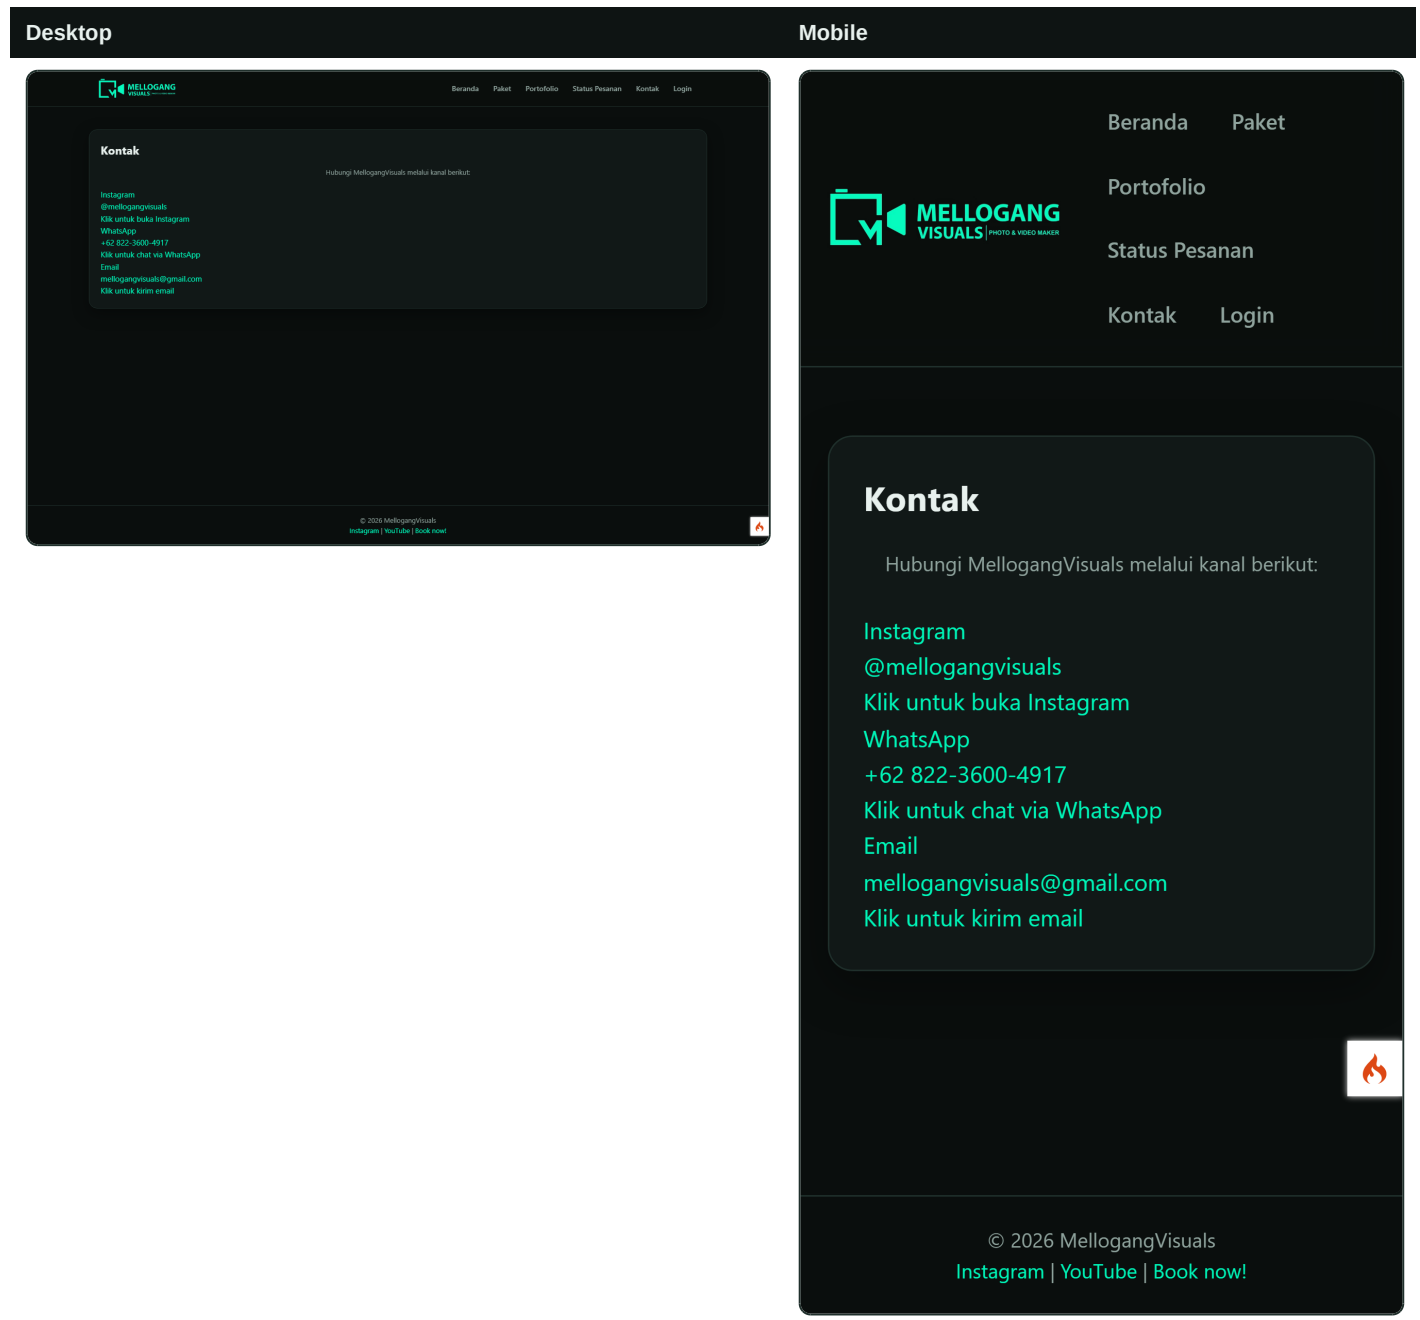

Galeri hasil kerja. Sumber: tabel `portofolio` + cache `social\_post` (item featured dari YouTube / Instagram yang di-fetch admin via tombol).

Desktop	Mobile
---------	--------

Kontak — `/kontak`

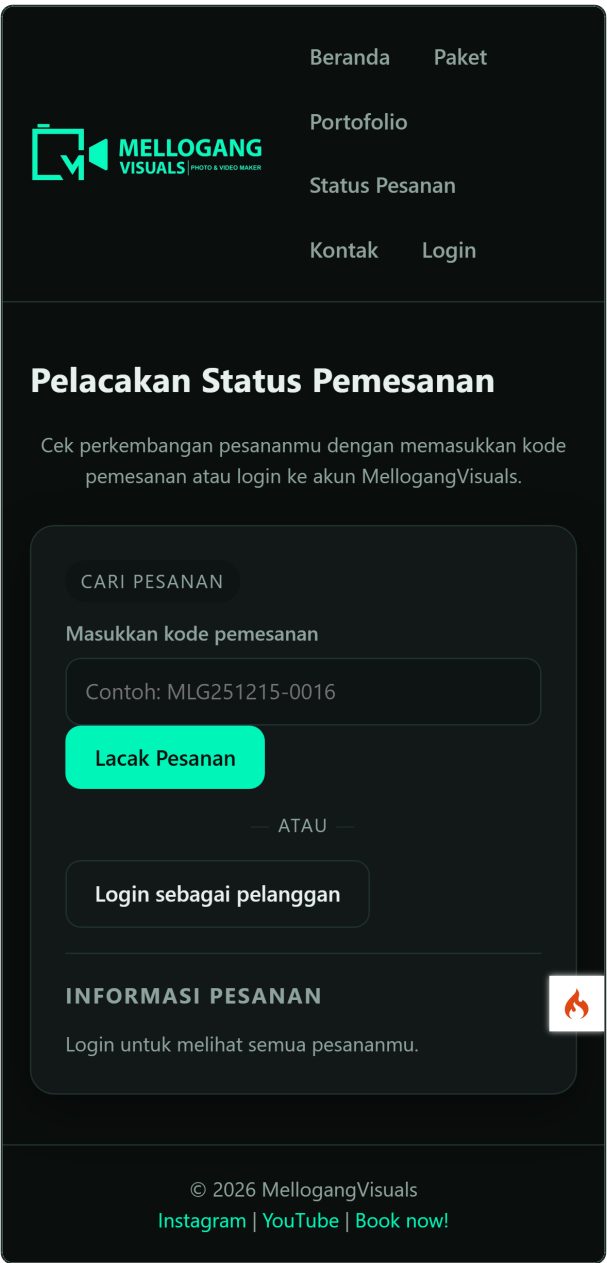

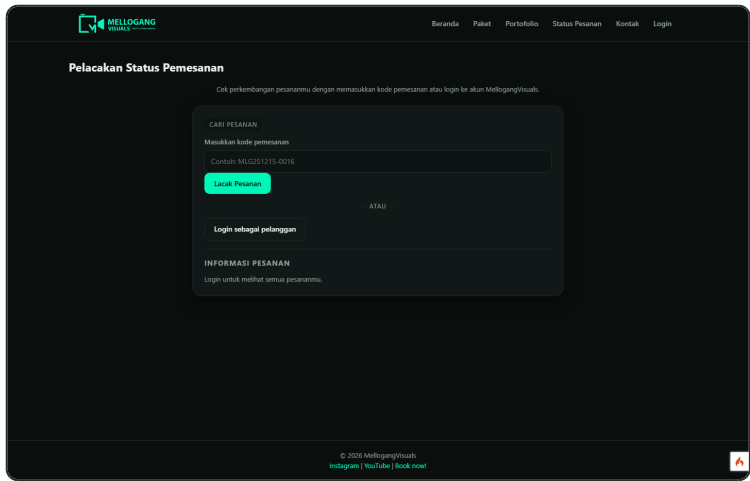

Info kontak brand (alamat, telepon, email, social).

Status Pesanan (kosong) — `/status-pesanan`

Halaman untuk melacak pesanan dengan kode. Versi ini adalah form input kode sebelum ada data pesanan yang dimuat.

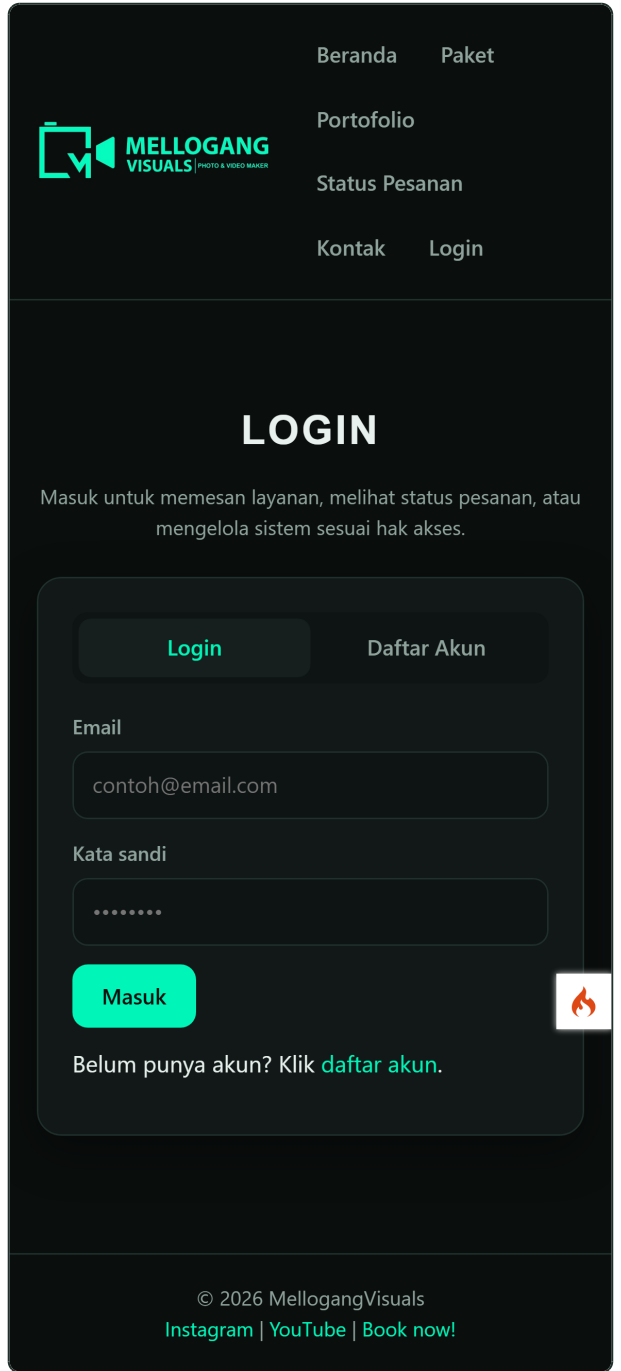

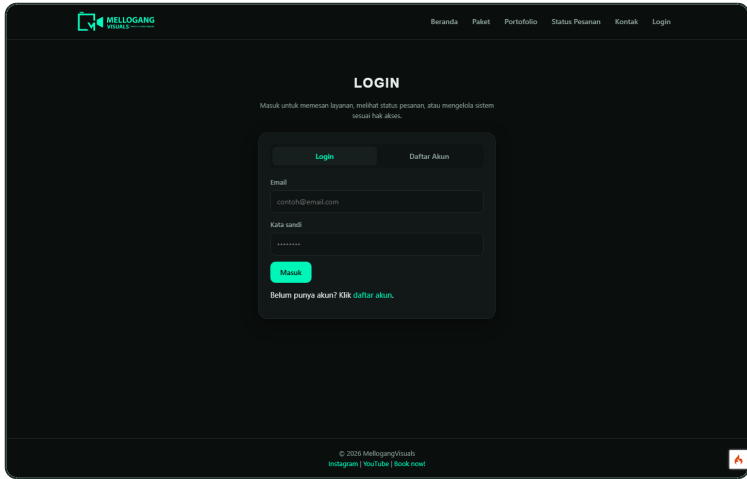

Login — `/login`

Form login. Ada tombol "Lanjut dengan Google" kalau `GOOGLE\_CLIENT\_ID` dikonfigurasi.

Pesan error ditampilkan jelas (termasuk pesan "Akun dikunci sementara...").

Desktop	Mobile
---------	--------

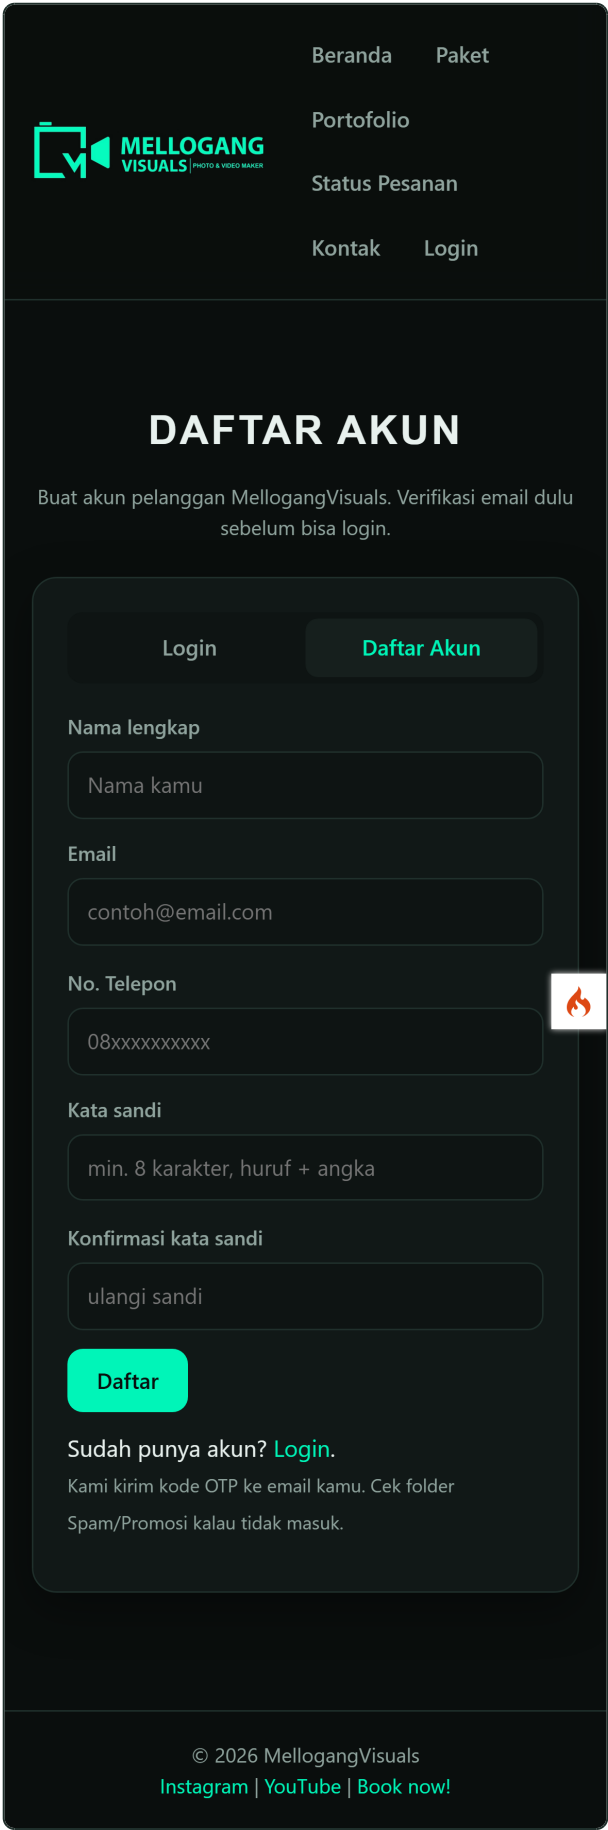

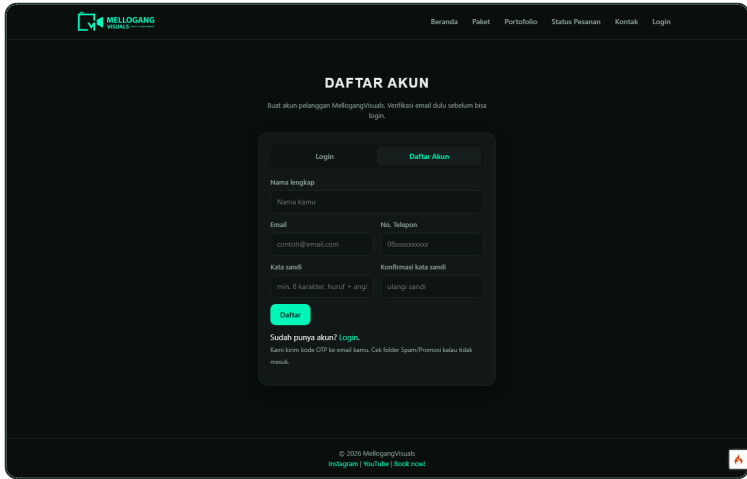

Register — `/register`

Form pendaftaran. Setelah submit, otomatis kirim OTP ke email (cek Spam/Promosi).

Catatan anti dot-trick: dua varian titik di Gmail dianggap satu akun.

Desktop

Mobile

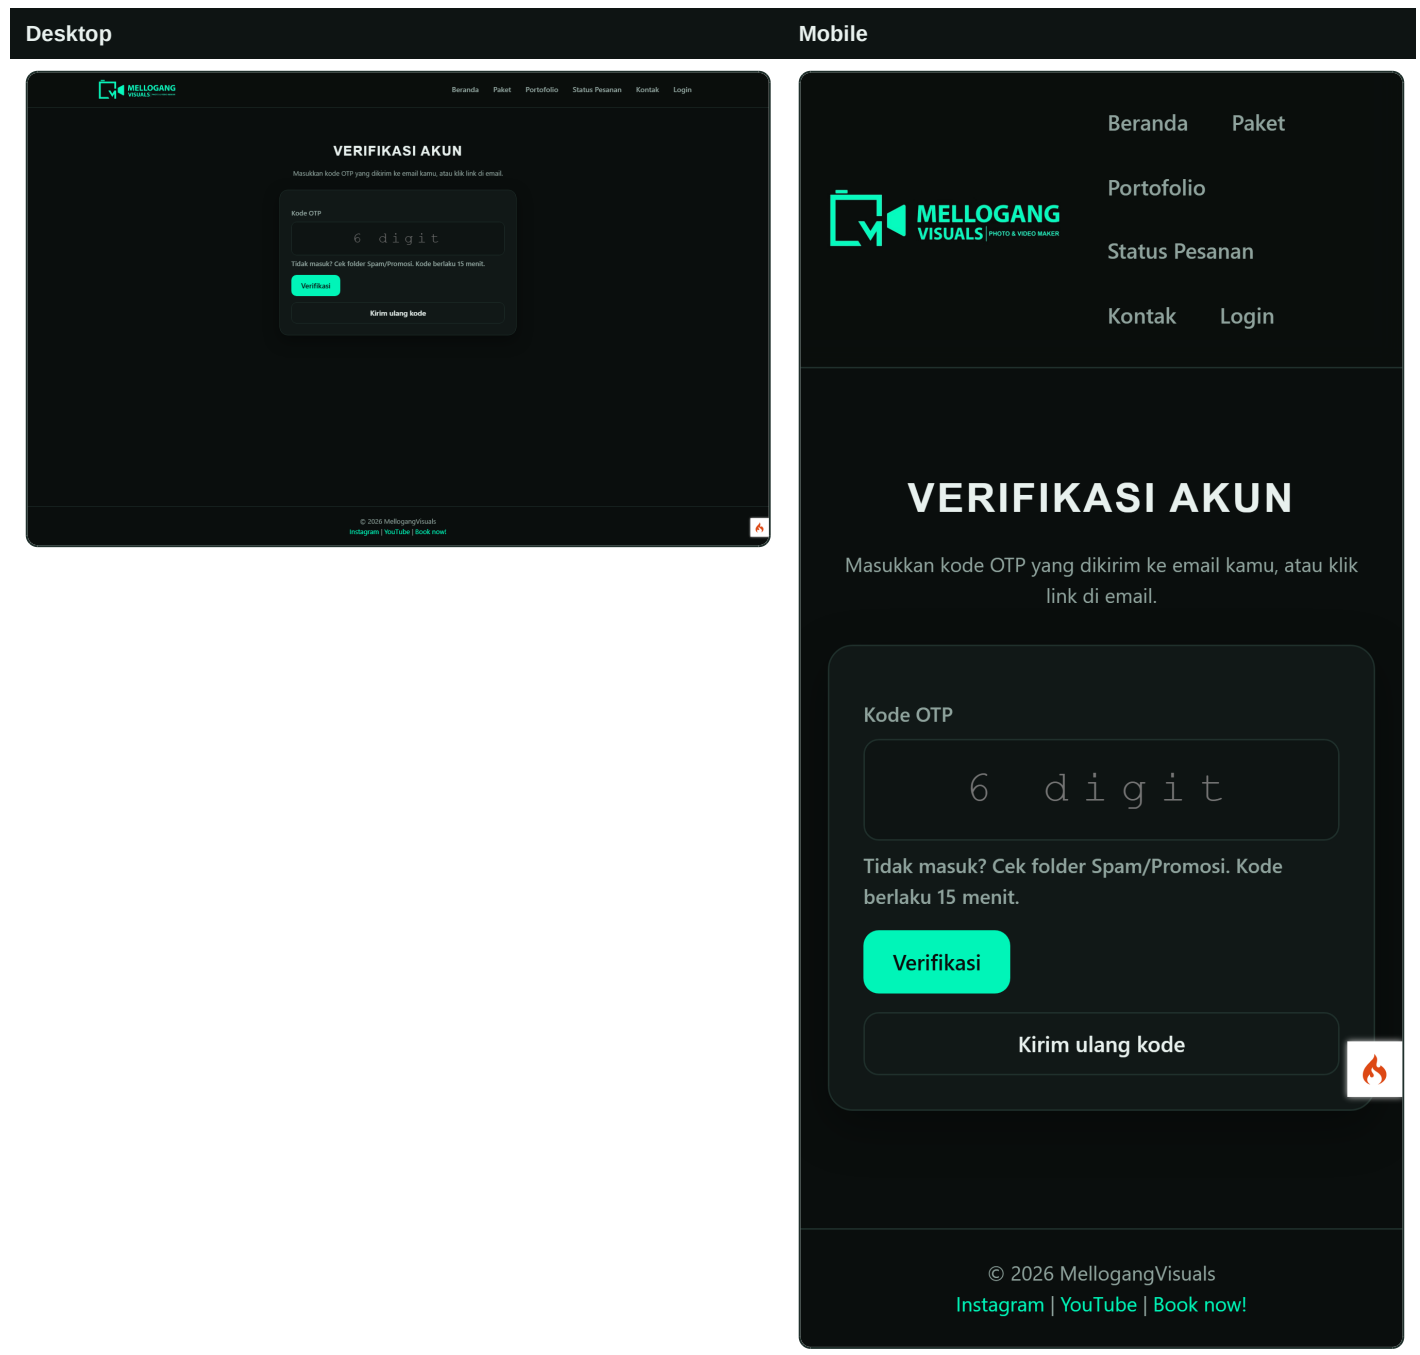

Halaman Otentikasi (transisi)

Folder: `screenshots/akun`

Verifikasi OTP — `/auth/verify`

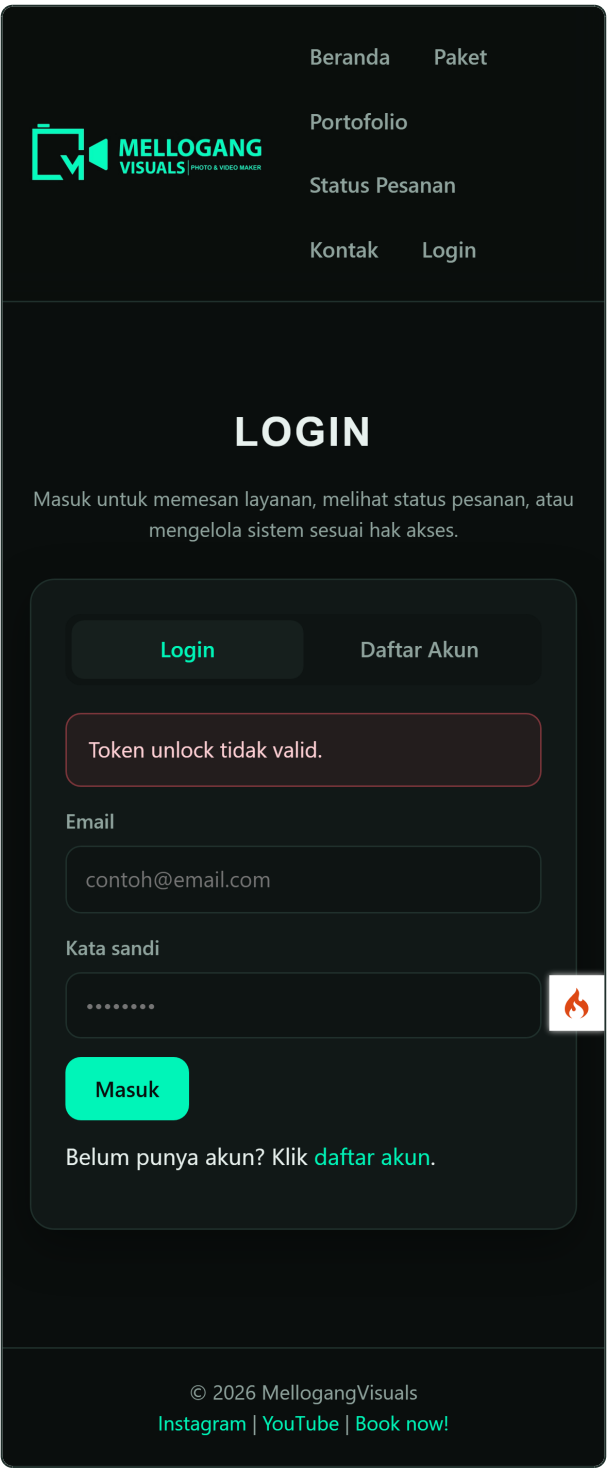

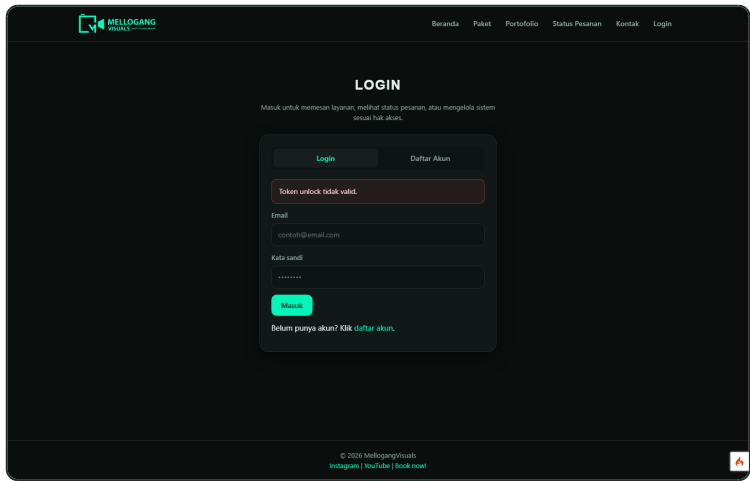

Halaman setelah register / login pertama. Input 6-digit kode OTP dari email, atau klik link otomatis. Ada tombol "Kirim ulang kode" (throttled).

Buka Kunci Akun — `/auth/unlock`

Halaman info kalau akun terkunci karena 4x salah sandi. Link pembuka dikirim lewat email; halaman ini tinggal menjelaskan alurnya.

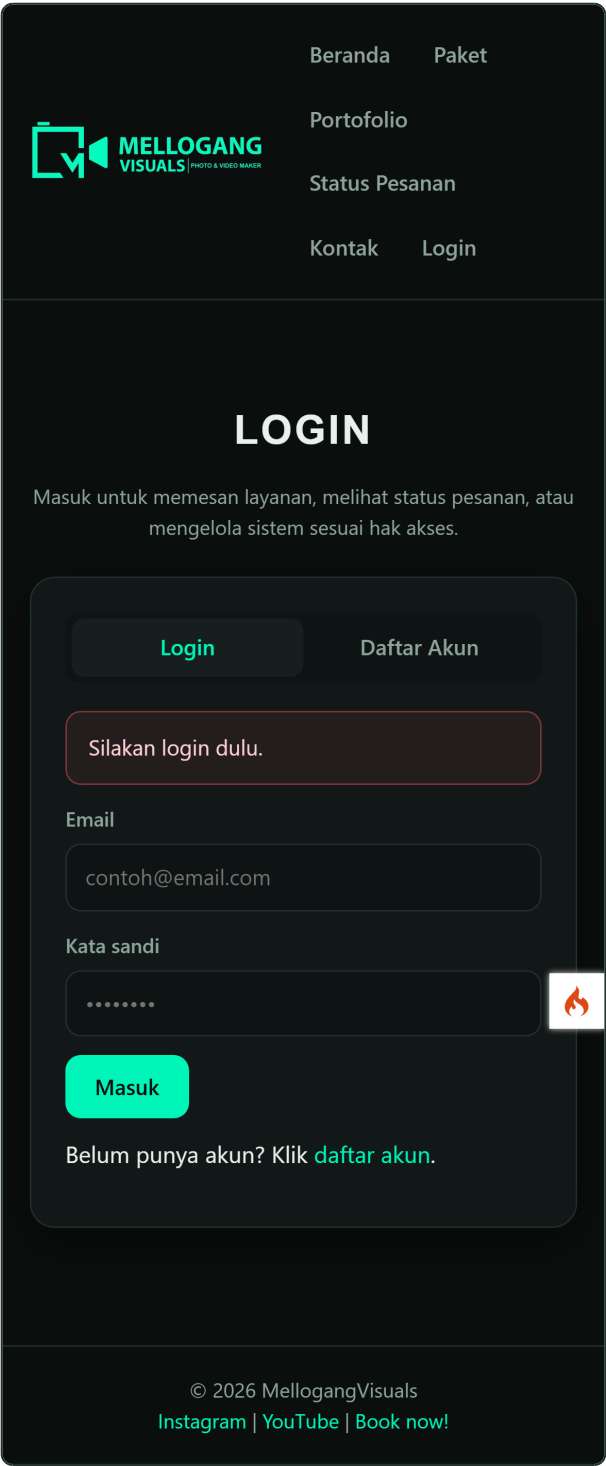

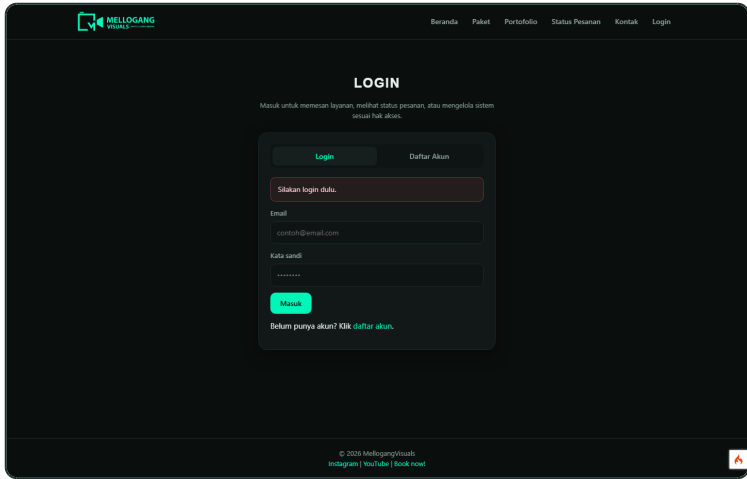

Halaman Pelanggan (setelah login)

Folder: `screenshots/pelanggan/`

Dashboard Pelanggan — `pelanggan`

Daftar pesanan milik user yang login. Status pakai pill berwarna (kanonik `App\Support\Status`). Tiap baris ada link ke form pembayaran / status detail.

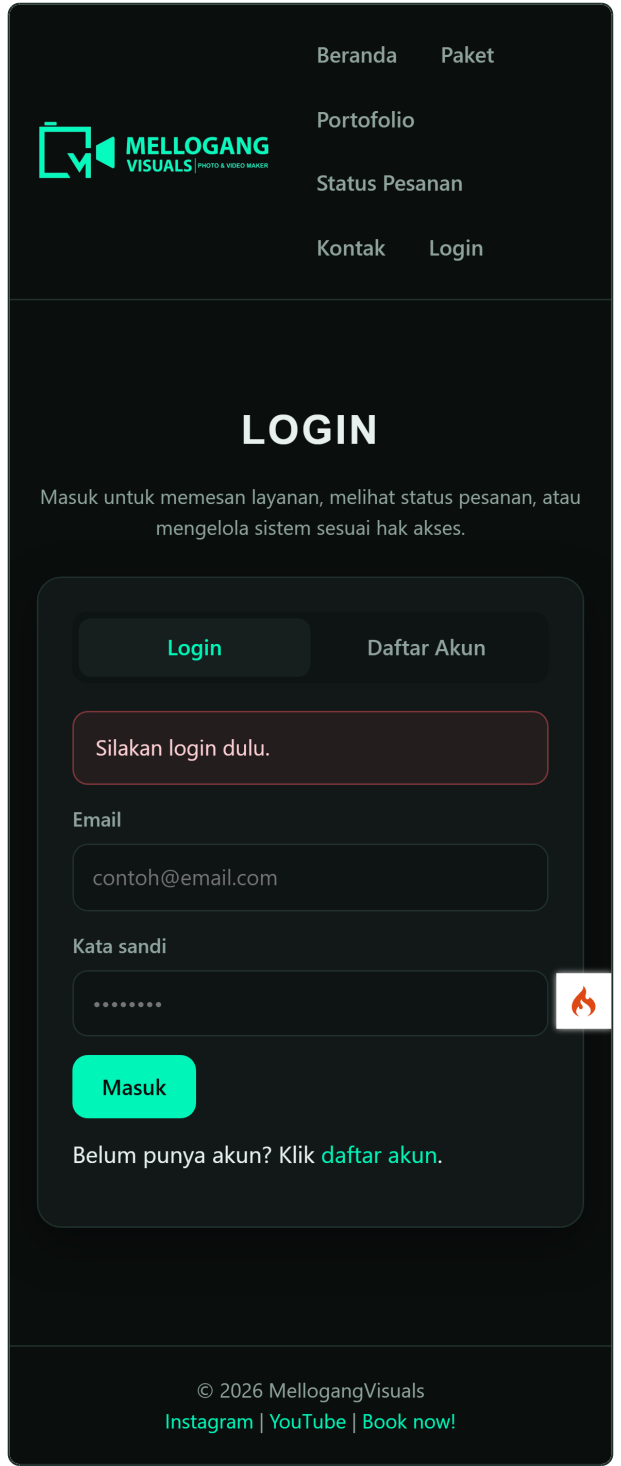

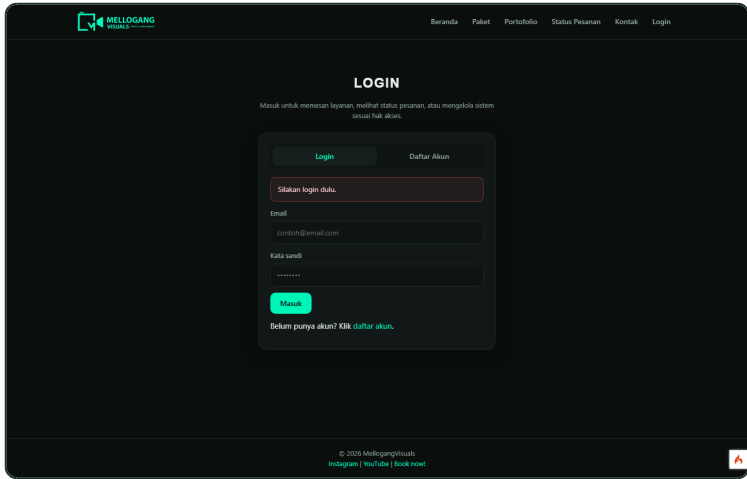

Desktop	Mobile
---------	--------

Buat Pemesanan — `/pelanggan/pemesanan/buat`

Form pilih paket + tanggal + jam + lokasi. Ada cek availability 2 fotografer per hari (lazy-check 2 jam untuk pembatalan otomatis). Submit ? order dibuat dengan status `menunggu\_pembayaran`.

Desktop	Mobile
---------	--------

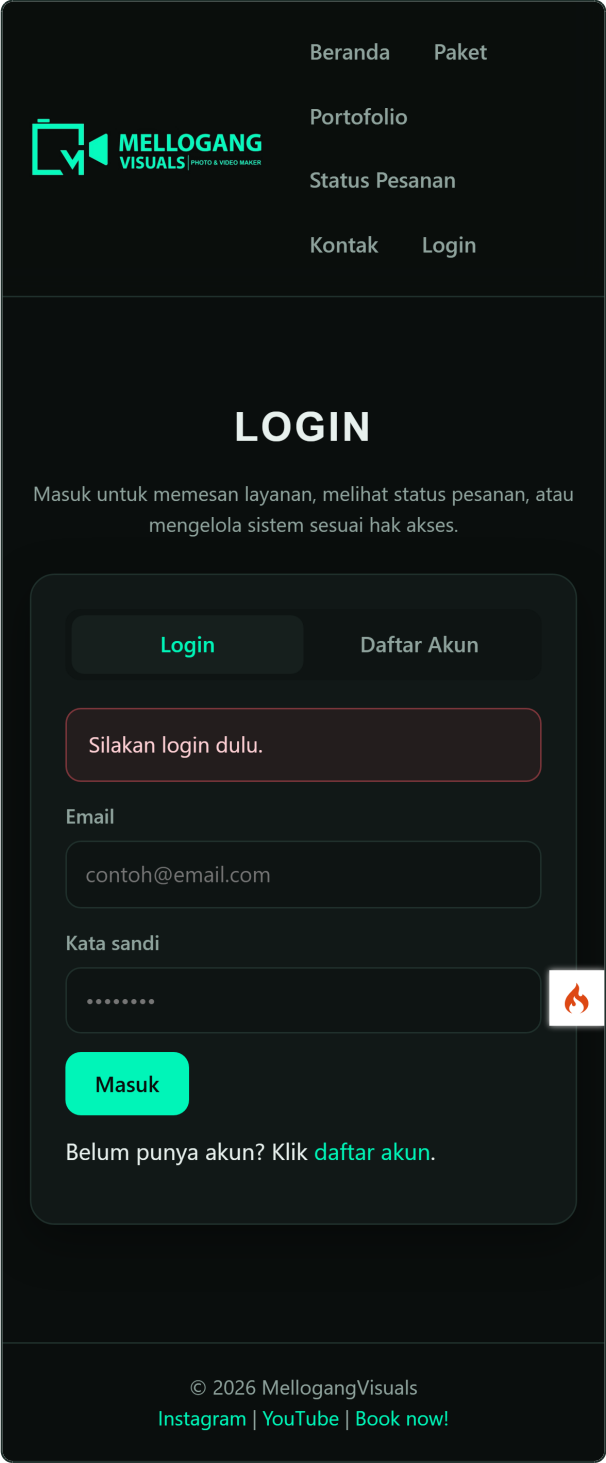

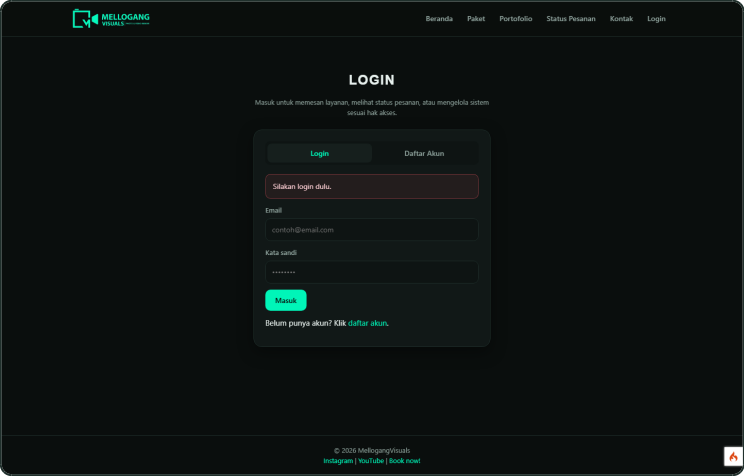

Halaman Admin (role: admin)

Folder: `screenshots/admin/`

Dashboard Admin — `/admin`

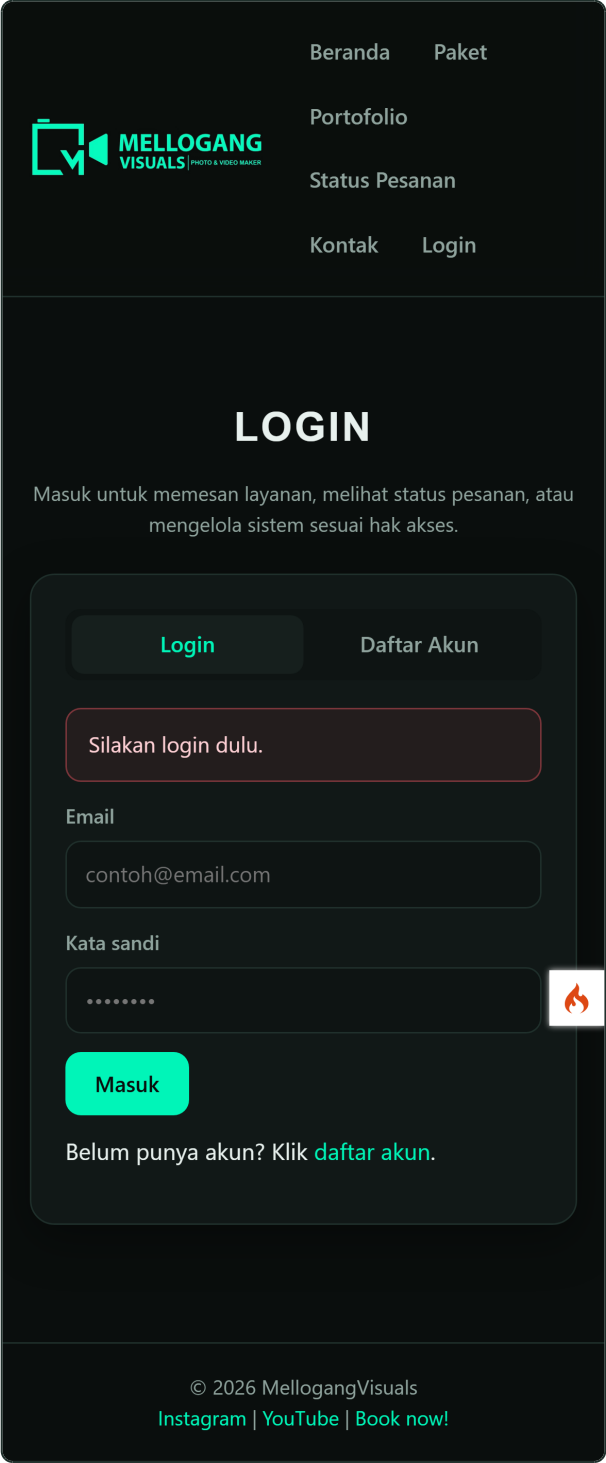

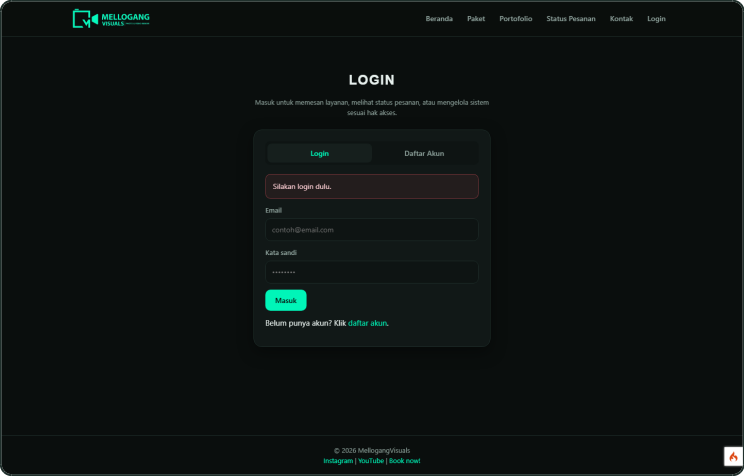

Ringkasan: jumlah paket, portofolio, pesanan, pembayaran menunggu. Plus 5 pesanan terbaru.

Pemesanan — ``/admin/pemesanan``

Daftar semua pesanan. Filter by status + cari by kode. Status pill berwarna.

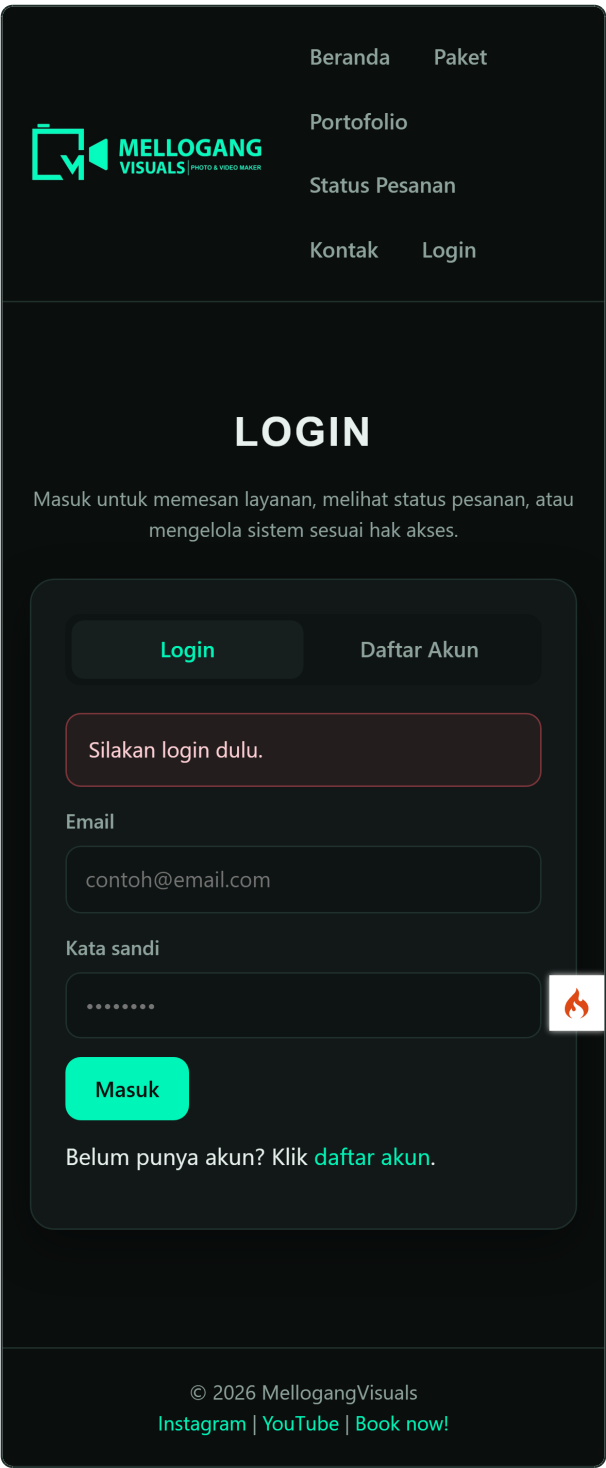

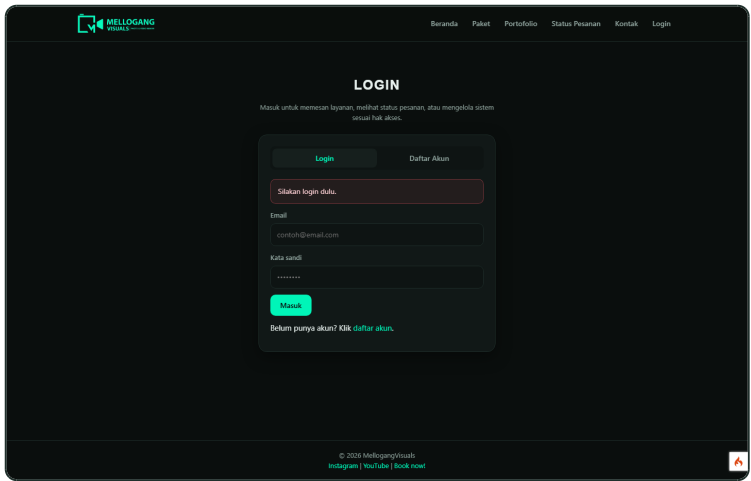

Desktop	Mobile
---------	--------

Paket — `/admin/paket`

CRUD paket foto/video. Tambah, edit, hapus paket. Centang `is\_active` untuk tampilkan di katalog publik.

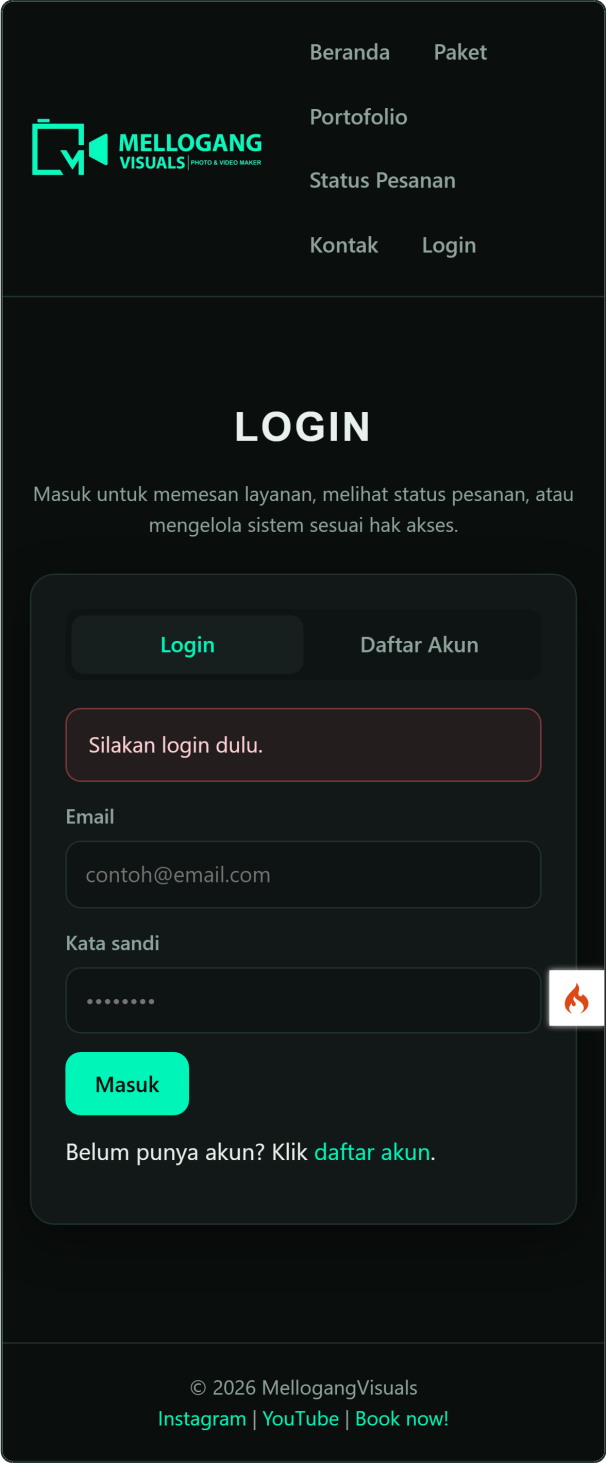

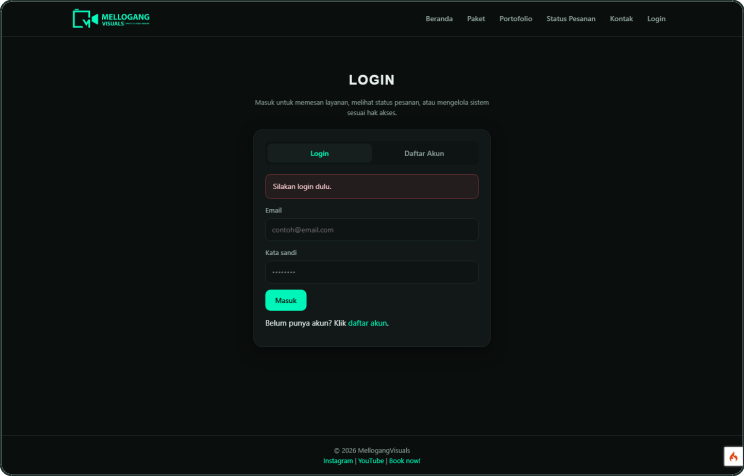

Desktop	Mobile
---------	--------

Portofolio Admin — `/admin/portofolio`

CRUD item portofolio (manual, selain cache social_post). Thumbnail upload disimpan di `public/uploads/portofolio`.

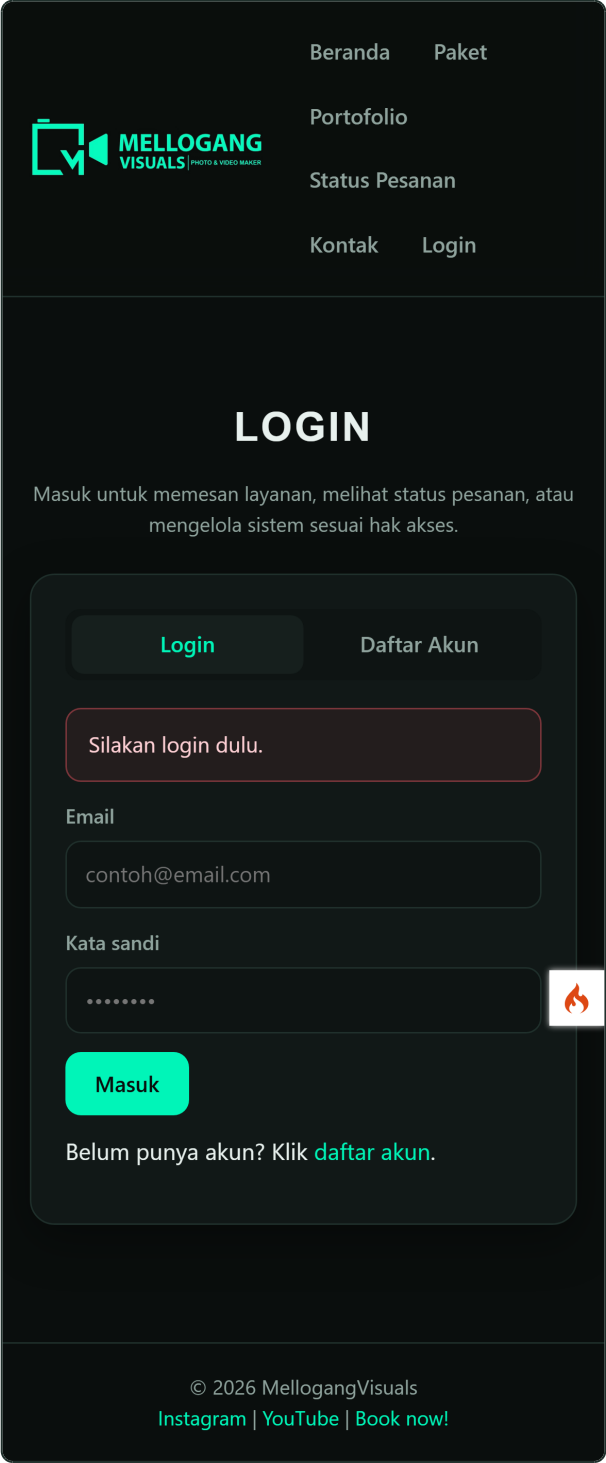

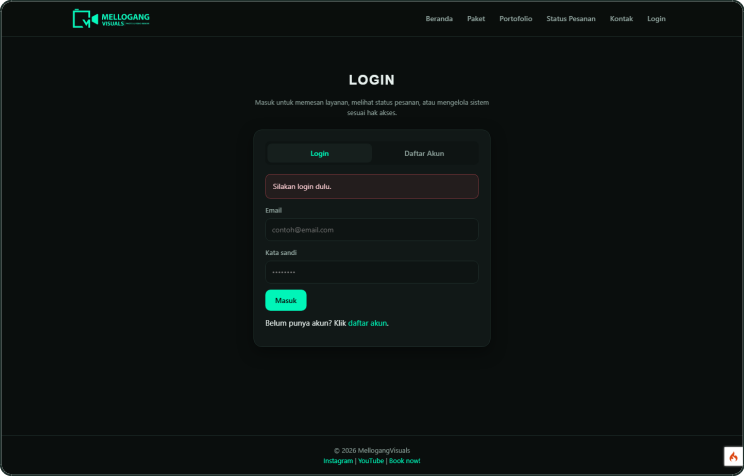

Desktop	Mobile
---------	--------

Pembayaran — `/admin/pembayaran`

Daftar pembayaran dari semua pelanggan. Filter by status verifikasi (menunggu / valid / ditolak). Tombol "Verifikasi" untuk ACC / tolak.

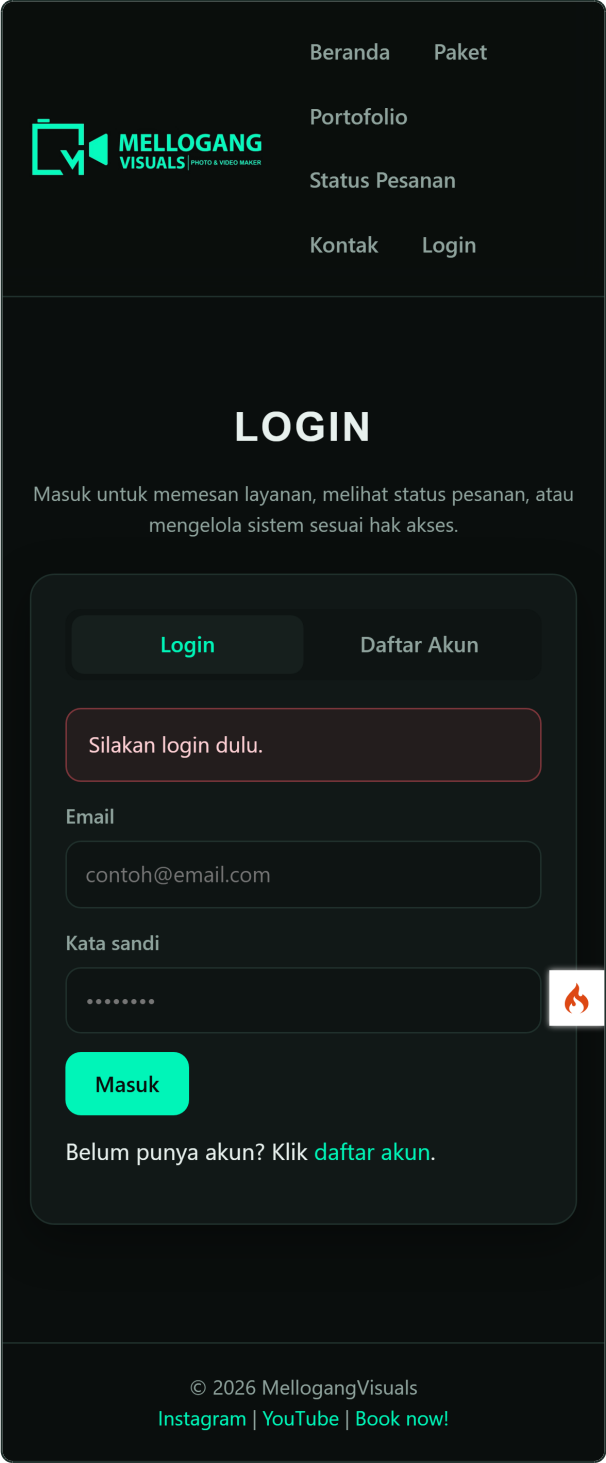

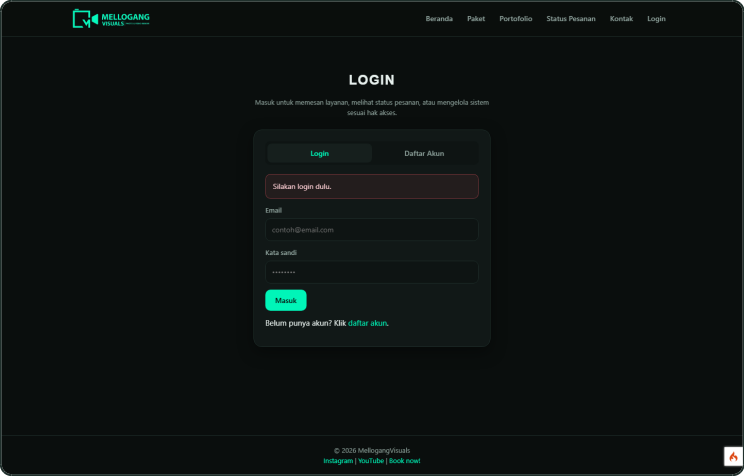

Desktop	Mobile
---------	--------

Jadwal Produksi — `/admin/jadwal`

Tabel jadwal. Admin pilih editor + tanggal shooting + editing. Status produksi diizinkan hanya sampai `cut\_to\_cut` (sisanya wewenang editor).

Desktop	Mobile
---------	--------

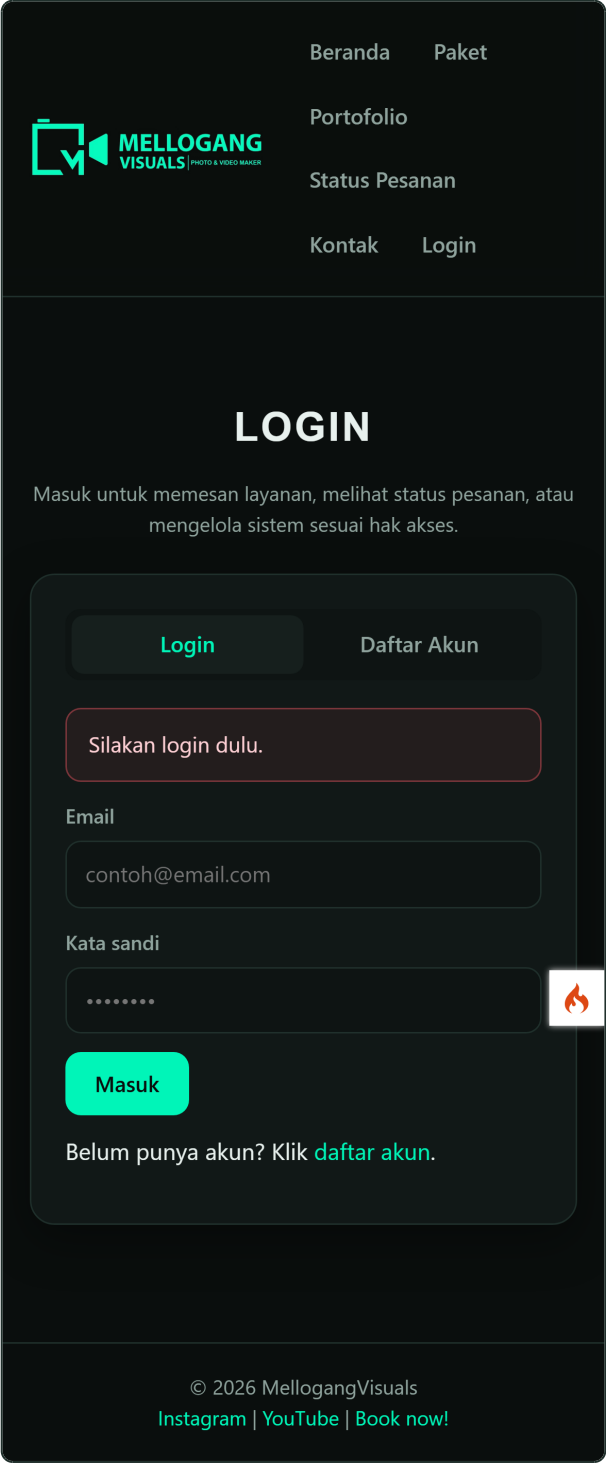

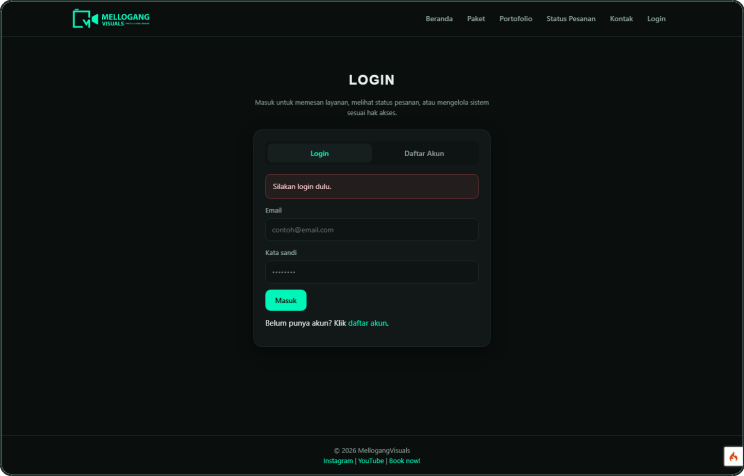

Laporan — `/admin/laporan`

Total pemasukan, total pengeluaran, laba bersih. Tabel valid + menunggu.

Export CSV per filter. Ada CRUD pengeluaran operasional.

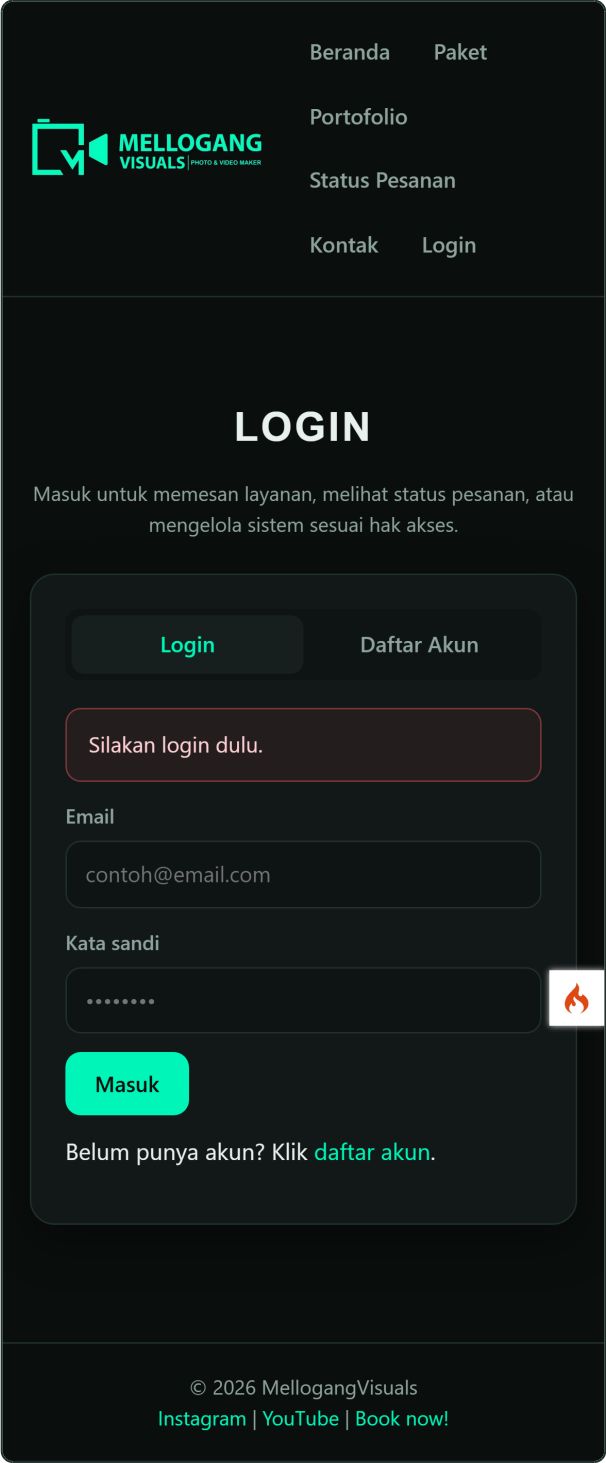

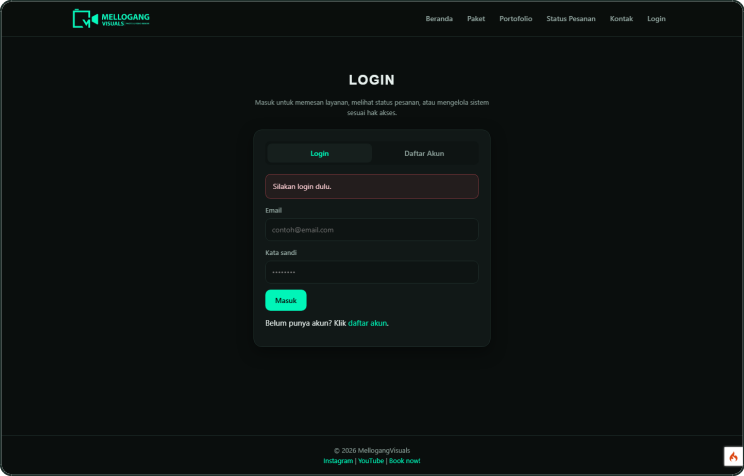

Desktop	Mobile
---------	--------

Users — `/admin/users`

Manajemen user. Edit role, hapus user. Admin tidak boleh menghapus dirinya sendiri.

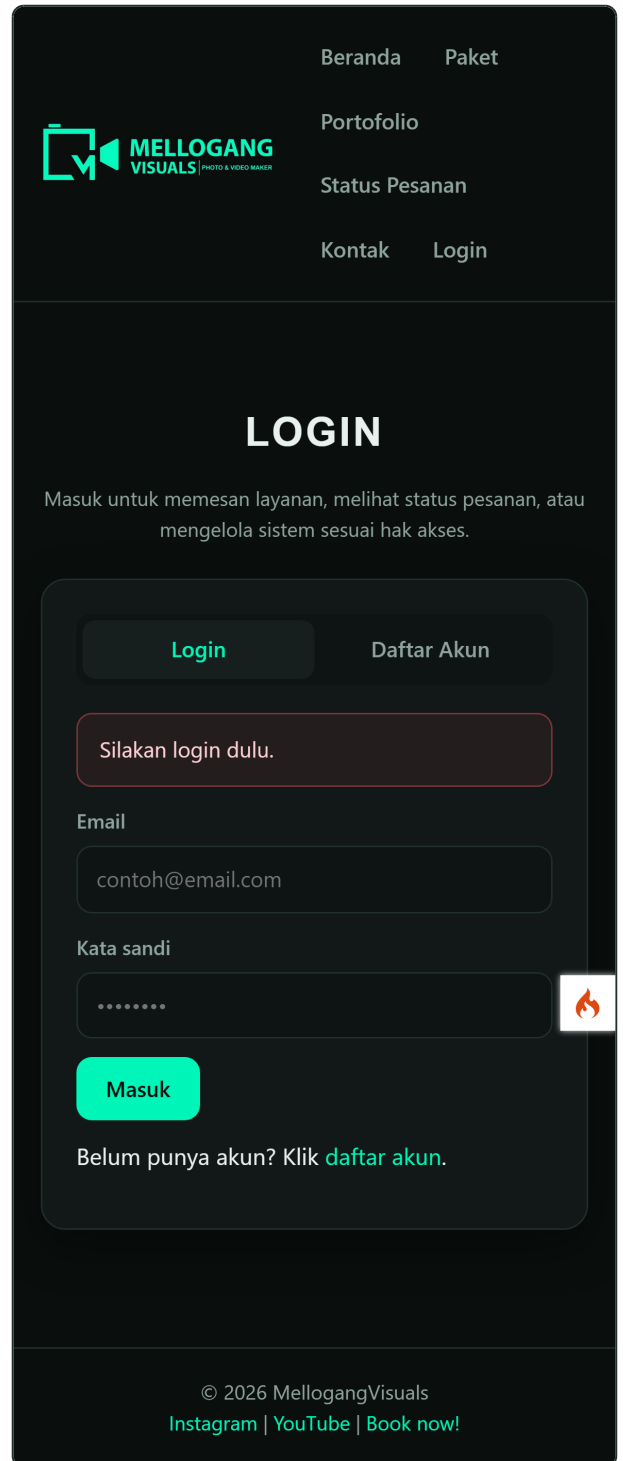

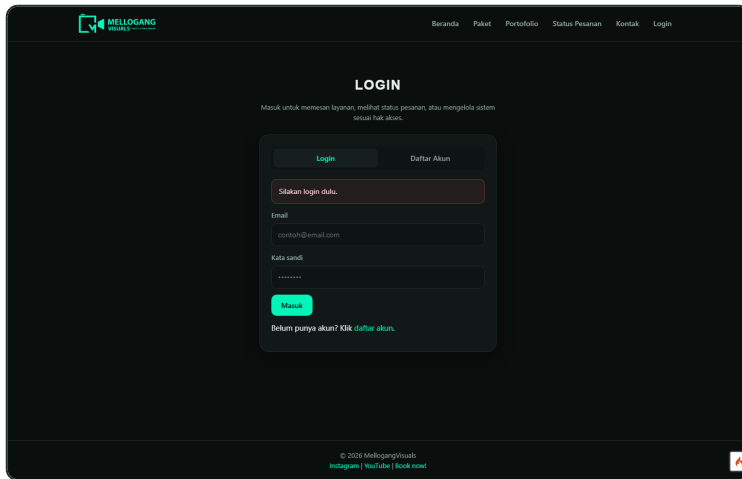

Desktop	Mobile
---------	--------

Social Cache — `/admin/social`

Halaman admin untuk trigger ****Fetch YouTube & Instagram****. Tombol "Fetch" panggil worker Node Playwright di background. Polling status setiap 3 detik. Cache `social\_post` ditampilkan di bawah. Tombol "?? Feature" untuk kurasi.

Desktop	Mobile
---------	--------

Halaman Editor (role: editor)

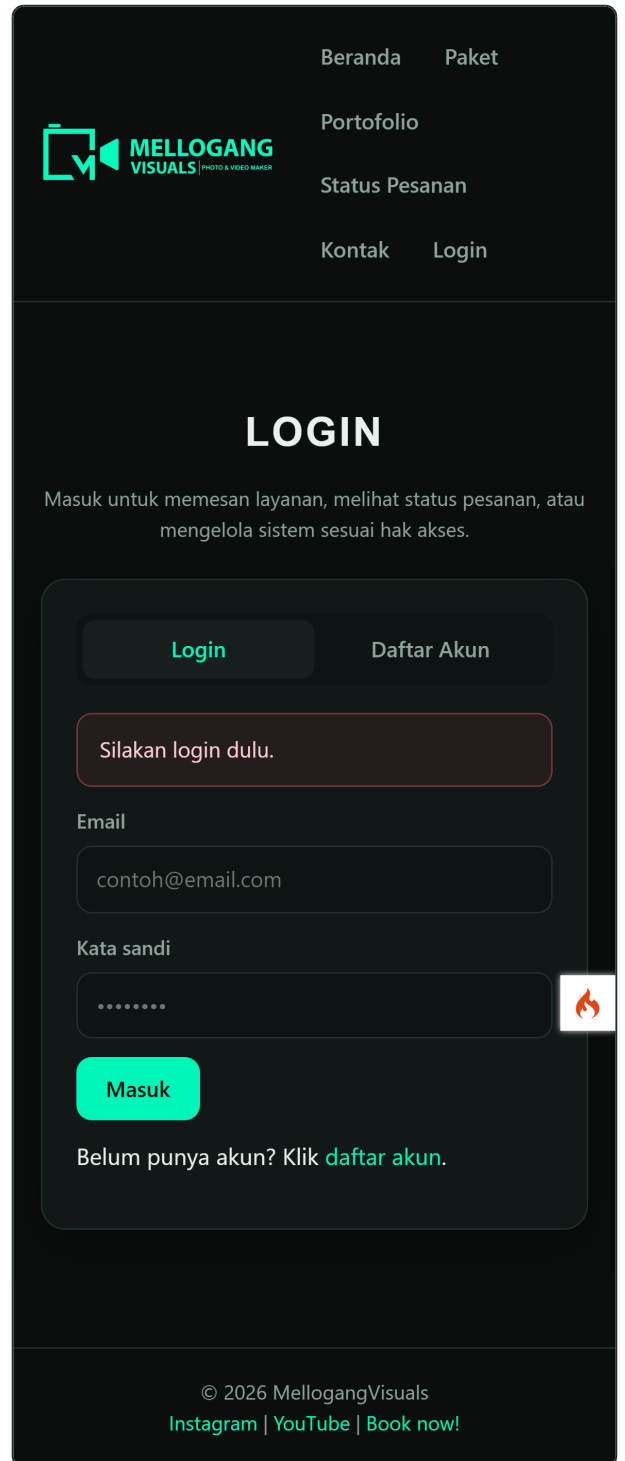

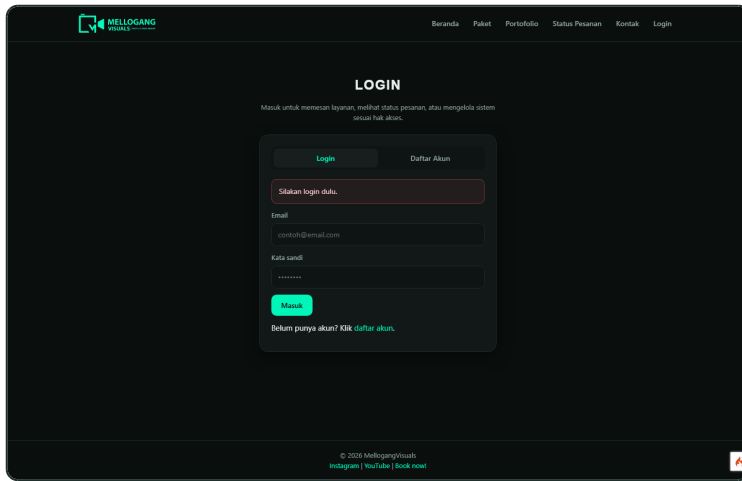

Folder: `screenshots/editor/`

Dashboard Editor — `/editor`

Kartu A/B/C/D untuk jumlah tugas per tahap editing (cut-to-cut, finishing, revisi, done+revisi_selesai). Modal pop-up muncul otomatis saat login (FCFS berdasarkan `tanggal\_selesai\_editing`).

Desktop

Mobile

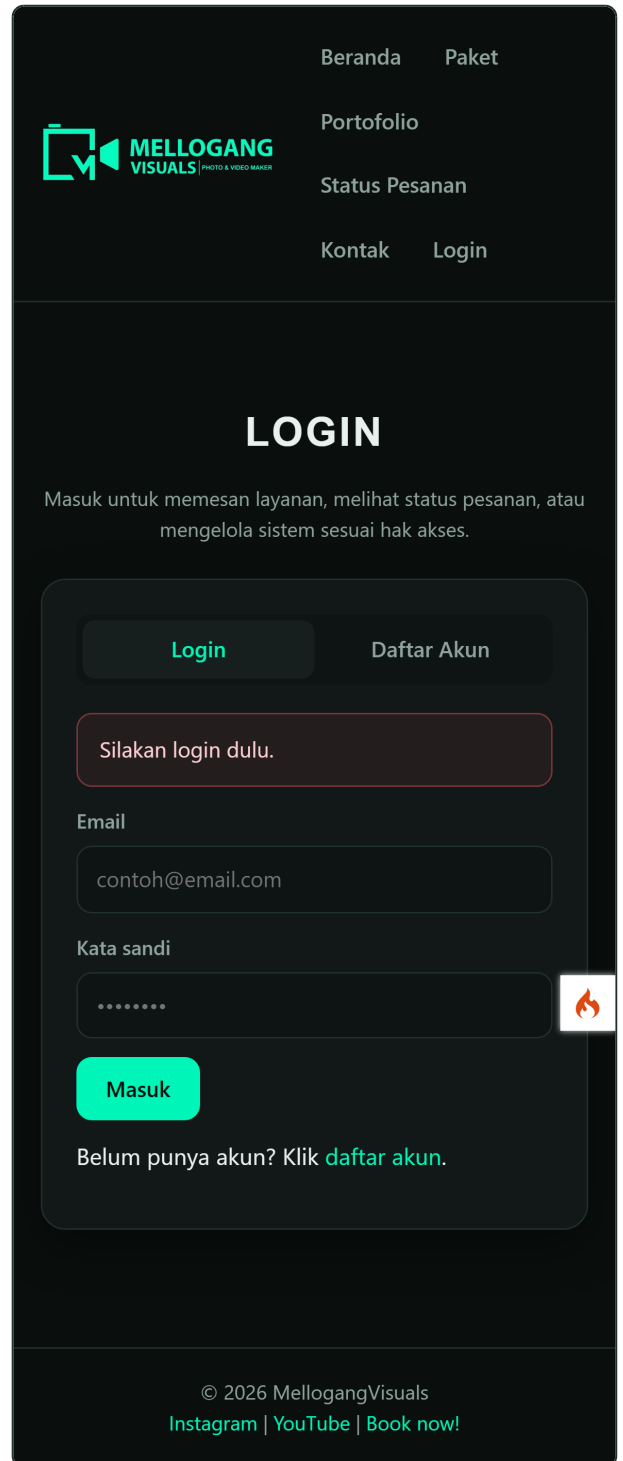

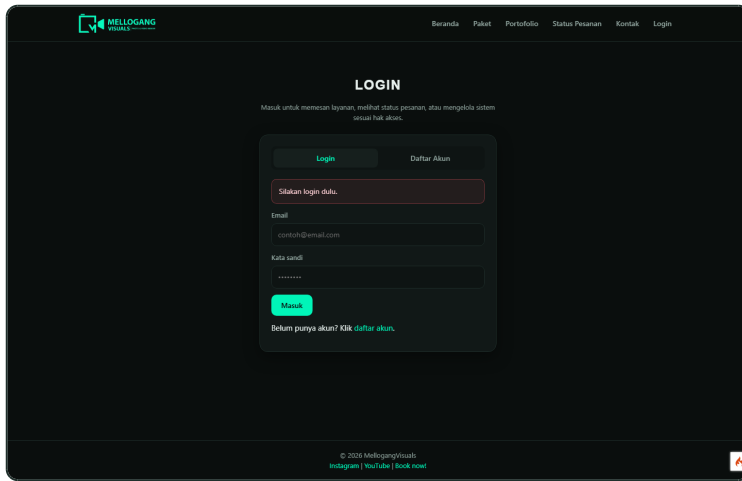

Daftar Tugas — `/editor/tugas`

Semua tugas yang di-assign ke editor. Filter by status. Klik baris ? detail tugas dengan form update progres + upload file preview + field `link\_hasil` untuk Google Drive.

Desktop

Mobile

Catatan tentang Screenshot

- Viewport: ****desktop 1440×900**** dan ****mobile 390 (iPhone 13)****.
- Browser: Chromium headless, lewat Playwright.
- Akun login: pakai akun seeder (`admin@mellogang.test`, `editor1@mellogang.test`, `pengguna1@mellogang.test`, password `123123`).
- Data dinamis (nama, jumlah, total) bisa beda kalau seeder diubah.

Untuk re-generate:

```
php spark serve --port 8080 &  
cd tests/e2e  
E2E_BASE_URL=http://localhost:8080 node capture.js
```

Output ditulis ke `pages/screenshots/-png`.
